Wasim Akram

Software Engineer 2 | Frontend Engineer

Bangalore, India | +91 8294469596 | contact.wasim963@gmail.com | linkedin.com/in/wasim-linked-in

PROFESSIONAL SUMMARY

Results-driven Frontend Engineer with 5+ years of experience specializing in React.js, TypeScript, and modern scalable frontend architecture. Proven track record of architecting enterprise applications serving 100K+ users, improving rendering performance by up to 40%, establishing automated testing standards, and mentoring cross-functional engineering teams to deliver measurable business impact.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Node.js
Frameworks & State:	React.js, Next.js, Redux
Frontend & Styling:	HTML5, CSS3, SCSS, Tailwind CSS
Testing & Build Tools:	Jest, React Testing Library, Webpack, Git, NPM, GraphQL
Core Fundamentals:	Data Structures & Algorithms (DSA), System Design, Object-Oriented Programming (OOPs)

PROFESSIONAL EXPERIENCE

HashedIn by Deloitte — Software Engineer 2

Bangalore | Jul 2024 – Present

- **Enterprise Platform Engineering:** Engineered and scaled an enterprise admin platform for Deloitte Ascend to accelerate client transformation journeys from discovery through deployment, alongside a Performance Management Tool enabling thousands of employees to submit assessments and peer feedback.
- **Resilient Bulk Upload Architecture:** Architected a fault-tolerant bulk upload module supporting 25 simultaneous downloadable file transfers via chunked uploads, Azure Blob Storage (pre-signed URLs), and retry-with-jitter mechanisms to minimize upload failures on large files.
- **Automated JSON Diff Engine:** Designed a deep JSON comparison engine capable of traversing 4–5 levels of nested objects, reducing manual analysis effort by nearly 70%.
- **Testing & Code Quality:** Raised frontend unit and integration test coverage from 0% to 90% using Jest and React Testing Library, significantly strengthening release confidence.
- **AI-Assisted Engineering Workflows:** Improved team engineering productivity by ~50% by integrating AI-assisted development workflows into daily feature delivery.
- **Cross-Functional Architecture:** Partnered across backend, product, and UX teams to define and build scalable, maintainable frontend architecture.

Aviza Solutions

Gurugram | Oct 2020 – Jul 2024

Development Engineer — **Jul 2022 – Jul 2024**

Associate Development Engineer — **Oct 2020 – Jun 2022**

- **Vertical Leadership:** Led frontend development for a new healthcare business vertical, shipping multiple enterprise-grade features within a 6-month timeline in close partnership with product managers, designers, QA, and backend engineers.
- **High-Scale Frontend Architecture:** Architected modular React.js, JavaScript, and Redux applications serving 100K+ users, prioritizing reusable components and maintainable code patterns to accelerate feature velocity.
- **Shared UI Component Library:** Designed and implemented an internal UI component library and shared frontend utilities, cutting feature development effort by 20–30% while enforcing visual consistency across products.
- **Rendering & Load Optimization:** Improved application rendering performance by ~40% through component memoization, efficient state management, and lazy rendering, while reducing initial load times by ~25% via code splitting, asset optimization, and client-side caching.
- **API & Latency Efficiency:** Reduced page latency across critical user journeys by minimizing redundant REST API calls, integrating complex business workflows, and refactoring legacy modules for long-term scalability.
- **Mentorship & Production Reliability:** Mentored junior engineers through structured code reviews and best-practice guidance, while diagnosing and resolving critical production issues with minimal end-user impact.

EDUCATION

Jamia Millia Islamia — B.Tech in Computer Engineering **2016 – 2020 | GPA: 8.6**
